

### Meet Paul Stubbs, Operations Manager

He seems to always be in two places at once – or has a twin we don’t know about. Paul Stubbs, Operations Manager for Geotech Services is a picture of perpetual motion around the office and shop. In the field, he’s a rock, steadily guiding the crews and navigating around whatever challenges they face on the job. Hired first as a field superintendent (a position he held for 17 years), Stubbs has become a cornerstone of the company, a go-to guy for customers and employees.

“Every day is a new adventure,” Paul laughs, “and I love every minute of it.” Stubbs manages a variety of projects for Geotech from rock and soil anchor and soil nail wall projects to slip lining, chemical & cement grouting jobs and erosion control projects. He’s the guy who coordinates the crews, gets them out into the field and orders materials for projects. He also does some of the bidding on future projects and keeps an eye on schedules and commitments to Geotech’s customers.

He jokes that it seems like he’s been with Geotech Services forever but adds that time has really flown by. “I love the diversity of work we do. Every day is something new. Some of the field guys say we do everything that nobody else wants to do. I think that’s what keeps things interesting,” says Stubbs.

A native of Springfield Township, Ohio, Paul still lives in the area with his wife, Jennifer, and their four children – Sarah, Laura, Paul Jr., and Erin. An avid outdoorsman, Paul enjoys deer and waterfowl hunting but adds that those avocations have given way to the active sports schedules of his children. All three girls play travel softball and Paul Jr. keeps him running with travel baseball, football and wrestling.

“I guess you might say that there aren’t any dull moments at home or at work,” says Stubbs. “Maybe having a clone or twin wouldn’t be such a bad idea.”
